

NURSERY PROFILE ESTABLISHMENT CHECKLIST

Below, find the information that you will need to establish nurseries on TerraMatch

*Indicates required information

☐ **Nursery Name***

Please choose a short (3–8 words) name. We recommend combining the organization name and nursery location for easy reference (e.g., Tree Organization – Northeast Nursery)

☐ **Describe the characteristics of this nursery.***

Explain how you manage this nursery, its proximity to your TerraFund planting sites, and, if you are expanding an existing nursery, its operational history.

☐ **What type of nursery management approach will this project use? ***

Select the option that best describes how your organization will engage with the nursery under this project.

New Nursery: *A nursery that is newly established, including setting up infrastructure, sourcing materials, procuring seeds, and starting seedling production.*

Nursery Expansion: *An existing nursery that increases its production capacity for the project, by expanding infrastructure, enlarging facilities, or producing more seedlings.*

Co-Managed Nursery: *A nursery jointly operated with a community or partner, where the organization might be supporting maintenance, production management, and quality control to build skills or economic opportunities or any other activity*

☐ **Start Date of Nursery Activity***

This refers to the date where the nursery will begin growing the first seedling that will be planted on a TerraFund site. If this is a new nursery, this date will match the first date of the nursery's operations.

☐ **End Date of Nursery Activity***

This refers to the date when the nursery will export its last seedling to a TerraFund site. This does not necessarily denote the last date of operations at a nursery if it is sourcing other projects.

☐ **How many seedlings will be grown in this nursery for your TerraFund project?***

Indicate the number of mature, ready-to-plant seedlings that this nursery expects to grow to maturity over the lifetime of the project. This should include only the number of seedlings that will be planted on TerraFund sites, even if the nursery supplies multiple projects.

☐ **How many seedlings of each species will you grow within this nursery as part of your TerraFund project?***

Please enter the scientific name and count of each tree species grown in this nursery. The total number of seedlings grown for each species must add up to the total number of seedlings that the nursery will grow. This list should only include species that are included in your TerraFund contract.

☐ **Photos and Videos.**

Please add any images or videos of this nursery.
